- HTML/CSS
- JavaScript
- React.js
- Redux
- Bootstrap
- Node.js
- MongoDB
- Git
- Teamwork
- Problem solving
- Communication
- Approachibility

CAREER OBJECTIVE

I'm currently working for JP Autoceste FBiH. Through 2021 year, I've been studying, exploring and building my own web sites and web applications. My passion is web development, and I'm **continuously** working to level up my programming skills. I enjoy solving problems, and I'm always seeking improvement in the work I do.

Nevertheless, I have a curious mind which often leads me to want to learn more about how tools work under the hood. Capable of continuous learning from senior developers, with a desire to apply skills on a larger development team.

WORK EXPERIENCE

Odjel operative naplate cestarine

JP Autoceste FBiH d.o.o

📅 December 2014 - current
